

JOIN US AT THE BEGINNING OF A NEW ERA IN LOW DENSITY LIPOPROTEIN CHOLESTEROL (LDL-C) LOWERING PCSK9 INHIBITION

WHAT ARE PCSK9 INHIBITORS?

PCSK9 inhibitors are exciting novel treatments which may provide clinicians with important new therapies for patients with significantly raised low density lipoprotein (LDL) cholesterol levels and at increased risk of premature cardiovascular death and disability.

STAY INFORMED WITH EXPERT OPINION

- ▼ What is PCSK9?
- ▼ What is the importance of PCSK9 in LDL-C metabolism?
- ▼ What are PCSK9 inhibitors?
- ▼ How low can these lower LDL-C?
- ▼ What is known about their therapeutic potential?
- ▼ How could they alter the management of patients at high risk of premature cardiovascular death and disability?

PCSK9 FORUM

EDUCATION AND RESEARCH

JOIN US ON THE NEW FRONTIER OF DYSLIPIDAEMIA MANAGEMENT

WHAT IS THE PCSK9 FORUM?

We are an independent, not-for-profit educational group established and managed by researchers and clinicians to provide healthcare professionals with news, analysis and commentaries about the rapidly evolving scientific knowledge and clinical development of PCSK9 inhibition.

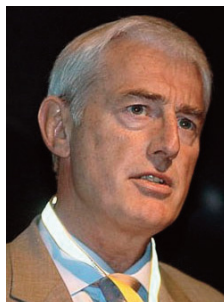

Members also have access to up-to-date, expert-developed educational resources.

WHAT THE FORUM OFFERS YOU

Members have free and unrestricted access to:

- ▼ Regular, real-time news and analysis
- ▼ Commentaries by independent and authoritative researchers and clinicians
- ▼ Educational resources including slides, on-line presentations and videos
